

Postdoctoral Positions Algorithmic Methods in Computational and Systems Biology group

Postdoctoral Research Fellow positions are often available in the AlgoCSB group. Candidates with a PhD in computer science, computational biology/bioinformatics or a related discipline and no more than 5 years of prior postdoctoral training will be considered. Excellent programming, algorithms development, and data analysis skills are necessary. Hands-on knowledge of statistical tools and biological databases is desirable.

This position is supported by the Intramural NIH Research Program and includes stable funding, excellent benefits and compensation. NIH is an Equal Opportunity Employer and encourages applications from women and minorities.

If interested, please email your CV to Teresa Przytycka at przytyck@ncbi.nlm.nih.gov.
